DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-6, 40, and 41, drawn to methods for the inhibition of HCV viral replication or polyprotein processing comprising the administration of a compound that inhibits NS2/3 autocleavage.

Group II, claim(s) 7, drawn to methods for the inhibition of HCV viral replication or polyprotein processing comprising the administration of a nucleic acid encoding a fragment of an HCV NS4A protein that inhibits NS2/3 autocleavage.

Group III, claim(s) 26-28, drawn to compounds comprising polypeptides having the structure illustrated in claim 26.

Group IV, claim(s) 42-44, drawn to methods for screening for compounds that inhibit HCV replication or polyprotein processing comprising the selection of a compound that binds the NS4A target site.

For Groups I and II above, restriction to one of the following is also required under 35 USC 121. Therefore, election is required of one of Groups I-IV, and, if one of Groups I or II is elected, then election is also required to one of the subinventions represented by the sequences falling within the formula described in (e.g.) claim 3. The Applicant is required to elect a specific polypeptide disclosed in the application that falls within the indicated formula.

2. The inventions listed as Groups I-IV, and as the subinventions to Groups I and II, do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the common technical feature among these inventions are the polypeptides such as those defined in claim 26. Such a polypeptide is taught by the art. See e.g., Butkiewicz et al., Virology 225: 328-38 (of record in the IDS of June 11, 2002). Because the art teaches that common feature among

Art Unit: 1648

the inventions, the inventions share no common special technical feature. Unity is therefore lacking.

Conclusion

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

4. The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and a product claim is subsequently found allowable, withdrawn process claims that depend from or otherwise include all the limitations of the allowable product claim will be rejoined in accordance with the provisions of MPEP § 821.04. **Process claims that depend from or otherwise include all the limitations of the patentable product** will be entered as a matter of right if the amendment is presented prior to final rejection or allowance, whichever is earlier. Amendments submitted after final rejection are governed by 37 CFR 1.116; amendments submitted after allowance are governed by 37 CFR 1.312.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103, and 112. Until an elected product claim is found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowed product claim will not be rejoined. See "Guidance on Treatment of Product and Process Claims in light of *In re Ochiai*, *In re Brouwer* and 35 U.S.C. § 103(b)," 1184 O.G. 86 (March 26, 1996). Additionally, in order to retain the right to rejoinder in accordance with the above policy, Applicant is advised that the process claims should be amended during prosecution either to maintain dependency on the product claims or to otherwise include the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.**

Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.
